## **Selling Price Automatic Update Solution**

This solution allows you to automatically update the selling price of all your products in milliseconds, just add your margins once by category and keep your shop updated.

Forget about remembering to update your selling price, now with this easy to use tool you can keep your selling price updated and never lose a sale again.

This solution will automatically update your complete database by a click of mouse; you only need to set your profit margins once by category or select to save the same settings on all sub categories. You have the option to add a fix amount, a percentage or a combination of both depending only on your selling strategies.

This solution is also fully integrated with the WASATO <u>supplier's integration tools</u>, so it will automatically run after the new buying prices have been updated.

Features,

You need as well to have the following libraries:

- Zlib

- GZIP enable

- XML
- Curl
- mysql
- DOM
- Json

You may change these configurations directly in the php.ini file on your server.
